

Complementary feed for cats

# MiaCoat

to support the skin and coat metabolism  
and facilitate bezoar expulsion

The art of mixture

# MiaCoat

to support the skin and coat metabolism  
and facilitate bezoar expulsion

reduces bezoar-related issues

strengthens the skin barrier

without added lactose

MiaCoat contains valuable vitamins and minerals that help to prevent nutritional deficiencies and strengthen the skin barrier. The addition of vitamins serves to build up, protect and regenerate the skin and hair and has also antioxidant properties.

The special vegetable fibres in MiaCoat ensure that the problems associated with the formation of hairballs after the ingestion of hair during the cat's daily cleaning activities are reduced. The hair can be better excreted.

#### Benefits at a glance:

- strengthens the skin barrier
- ensures a healthy, shiny coat
- facilitates hair excretion

MiaCoat is available in tablet form.

#### Feeding recommendation:

1–2 tabs/5 kg cat/day
