

Miabolit EC

No chance for the fatty liver syndrome

The art of mixture.

Miabolit EC

For an ideal liver metabolism

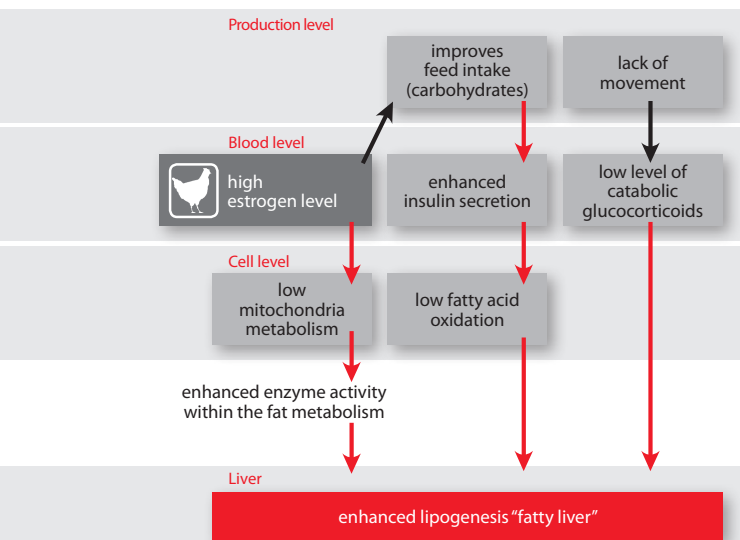

Different factors lead to the so-called nutritional fatty liver hemorrhagic syndrome, which is well known in laying hen production. For this reason MIAVIT has developed Miabolit EC as fast and effective feed supplement for your laying hens. Its lipotropic complex of active substances provides ideal support for the fat metabolism and minimises fatty liver formation.

Furthermore Miabolit EC contains high amounts of vitamins, pure lecithin and amino acids. Miabolit EC supports the overall liver metabolism guaranteeing perfect liver protection for your laying hens.

Miabolit EC. In a nutshell

- contains well balanced lipotropic additives and high amounts of B-vitamins
- lowers nutritionally caused fatty liver formation
- is enriched with lecithin
- guarantees an ideal liver metabolism

Metabolic processes in case of FLHS in laying hens

FLHS = Fatty liver hemorrhagic syndrome
